

RISK ASSESSMENT MATRIX

WHAT IS THE POTENTIAL RISK OF THE HAZARD?					
RISK ASSESSMENT	<u>Risk Assessment Steps:</u> 1) CONSEQUENCES: How severely could the hazard injure or cause illness 2) PROBABILITY: How likely is the consequence (in step 1) going to happen 3) FIND THE RISK PRIORITY NUMBER: At the intersection of the selected consequence and probability RISK PRIORITY Priority 1 – (High priority) Do something immediately Priority 6 – (Low priority) Plan to do something	RISK ASSESSMENT MATRIX (to determine Risk Priority)			
		Step1) CONSEQUENCE/s How severely could someone be injured?			
		Step 2) PROBABILITY How likely is the consequence going to happen?	Death or Disability	Injury Medical Intervention	First Aid
		Extremely High:- Very likely to happen	1	2	3
		High:- Likely to happen	2	3	4
		Medium:- May happen sometime	3	4	5
Low:- Unlikely to happen	4	5	6
